

# Q900

## Floorstanding Speaker

**5 Year**  
WARRANTY

### Applications

At the top of the Q Series sits the Q900, capable of making you truly believe you're sitting right in the middle of the action of any movie, or mere inches from your favorite artist.

### Product information

The Q900 model is the flagship model of the Q Series range, featuring a new generation Uni-Q MF/HF array paired with a 200mm (8in) long-throw bass driver of equal size, and two matching ABRs. The Q900s will flood the room with an intricate and intensely physical soundstage. As the front speakers in a home theatre system, these towering performers will create a flawless and mind blowing 3-D image that faithfully tracks the action on screen.

### Features & Benefits

#### *Uni-Q driver array*

Sweet, spacious and true, wherever you sit.

Thanks to the latest computer modelling techniques, years of painstaking development and a dash of design genius, the new iteration of the Uni-Q concept packs a formidable complement of design innovations. Based on the state-of-the-art HF driver developed for Concept Blade, the Q boasts a much larger (25mm/1 in. dome) tweeter for increased sensitivity and distortion-free power handling. It plays as loud as it plays true.

**Advanced bass technologies**  
**Deeper, tighter and more accurate bass.**

Featuring rigid new aluminium cone technology just like the Uni-Q array, the Q Series advanced bass driver is a tour de force in its own right. A die-cast aluminium chassis rigidly locates the high efficiency vented magnet assembly to prevent unwanted resonance, and the large (50mm) voice coil ensures impressive power handling. Its musicality is impeccable: seductively tuneful and well controlled, and on the floorstanding models, complemented by dedicated front-firing auxiliary bass radiators (ABRs).

**Total system design**  
**A holistic approach with no compromises.**

The performance envelope of these sensational new drive units is so generous that the signal needs minimal intermediation - simple first order crossovers are all that's required, as you can tell from the transparency of the sound and the inaudibly fluent transitions.

**Specifications**

DESIGN	Two and a half-way bass reflex
DRIVE UNITS	200mm (8in.) aluminium Uni-Q
	38mm (1.5in.) vented aluminium dome HF
	200mm (8in.) aluminium LF
	2 x 200mm (8in.) aluminium ABR
FREQUENCY RESPONSE	32Hz - 40kHz (±3dB)
CROSSOVER FREQUENCIES	1.8kHz
MAXIMUM OUTPUT	114dB (SPL)
AMPLIFIER REQUIREMENTS	15 - 200W
SENSITIVITY	91dB (2.83V/1m)
IMPEDANCE	8 Ohms
DIMENSIONS	1060 x 244 x 322 mm (41.7 x 9.6 x 12.7 in.)
	1107 x 359 x 322 mm (43.6 x 14.1 x 12.7 in.) with plinth
WEIGHT	22.1kg (48.7lbs)
UNIT MEASUREMENT	Pair
