ABOUT US

Follow us

Himel was founded by a Spanish entrepreneur in 1933. The company started in 1958 to produce industrial enclosures. In 1976, it then pioneered in exporting quality enclosures, establishing Himel brand globally.

Today, Himel is a value brand of Schneider Electric. Our global footprint and technology allows to provide the best combination of affordable and reliable offers for low voltage power distribution, industry automation and home electric in the over 50 countries where we are present.

Our Vision

Without discriminating who you are, big or small business, we value your business (from a financial and image perspective). We value Opportunities for All.

Our Mission

We provide access to the best combination of affordable and reliable electrical offers. We use our technology to provide standardized quality. We use our global footprint to ensure price competitiveness for what you need, not exposing you to overpaying or purchasing counterfeits.

Our Mindset

Being part of a Schneider Electric company, we think in global standards:

- International application ensures that we leverage ideas and inspirations from our diverse teams and use cases globally
- International technology with value engineering, mainly manufactured in China ensures low cost, reliable products
- International and proprietary automation standards with production lines, assures optimization, standardization and precision, hence assurance on quality
- International platform through digitization ensures better efficiency, consistency and visibility

• 2S = 200-240V Single Phase; 4T = 380-440V Three Phase;
• SM = Drive Single Phase Motor

Build-in MPPT

Maximum power point tracking ensures that you get the most power output possible from your solar panel and maximizes the performance of your pump throughout the day.

Dual supply (AC & DC) capability

The VSD is customized to operate in dual supply mode, so the grid connected supply is used in the absence of energy from PV cells.

Automatic start-run-stop through out the day

With water level detection in the tank and pump overload and under-load protection.

Easy to use

- Compact design
- Easy to install with Din rail
- Can run with default setting, no parameter set need
- One-key recovery function

Special program function

- Energy meter
- Flow calculation
- Support single phase motor water pump

Pump-specific protection

- Dry run detection.
- Voltage limit
- Overvoltage , overcurrent, overload protection
- Phase-loss protection
- Short-circuit protection

VARIABLE FREQUENCY DRIVES (VFD) - BASIC SERIES

Lead Control

- Built-in SVC vector control and V/F control model.
- Excellent Performance: 150% rated torque output at 1Hz.

Compact Structure

- High efficiency heat dissipation design, small size, saves the design space of distribution cabinet.
- IPM intelligent power module integrated with the main circuit design.

Rich Functions

- Built-in PID, Multi-speed operation (8 stages speed operation), simple PLC.
- Built-in brake unit and Standard MODBUS communication protocol.
- Many protections for over-current, over-voltage, over-load, over-heat, low-voltage etc.

VARIABLE FREQUENCY DRIVES (VFD) - EXPERT SERIES

Excellent performance

- Speed Stable Precision: $\pm 0.5\%$ rated synchronous speed (SVC).
- Speed Adjustment Range: 1:100(SVC).
- Torque Response: $< 20\text{ms}$ (SVC).
- Heavy Load Overload Capacity: 110% rated load stable operation, 150% rated load 1min, 180% rated load 3s.
- Low frequency large torque, under the open-loop vector model, can realize 0.5Hz stable load (150% rated load) operation.
- The drive can keep enough torque output capacity without tripping if there is an instant mutation load.
- Auto Current Limiting: Motor current can be controlled at a certain level without affecting the output torque.
- Can accurately identify the motor parameters, realizing high performance vector control.
- Can realize static self-learning, dynamic self-learning, and adapt to different working condition requirements.
- Can detect motor parameters accurately even if a long cable is attached.

Rich and comprehensive application functions

- Flexible Multi-stage V/F Curve, Multi-stage speed Control, Simple PLC application, Standard RS485 Communication.
- Selection of Frequency Source and Command Source; Frequency Binding and Switching; Frequency master and auxiliary.
- Pulse frequency input and output.
- Built-in PI control, Preset for closed-loop, Zero frequency difference.
- Swing frequency operation, Fixed length control, Speed tracking, Drop control, Instant stop non-stop.
- Automatic energy-saving operation, Multiple protection and overload warning.
- Built-in braking unit below 22kw.
